No. PIS 2/99 / Cleanliness

To all the landowners,

Dear all,

Subject: Plots cleaning and other open areas from dry weeds

Pissouri Community Council informs you that those of you who own fields or plots within or adjacent to the residential area must settle for their cleaning by the **28th of April 2023.**

It is noted that the plots cleaning will lessen the environmentally disturbing objects. Therefore it seems to be the best preventive measure to wipe out any possible fire events and their spread in extent. At the same time, the prompt cleaning of the plots will exempt the Council from cleaning them itself and therefore will avoid you from being charged such expenses for this purpose.

Hence, in case that the landowners won't have them cleaned after the required deadline, the Council will take the appropriate actions and therefore it will charge them with at least 150 euros per plot or per as decare, if it is a field.

We expect that you will positively respond to the Council's urging because only with your own cooperation and contribution we will ensure the proper hygiene and the well-being of our Community.

Yours sincerely

Petros Foutas

*Council Executive Secretary
Of Pissouri Community Council*
